This is a subscription database that can only be accessed from a UC computer or through UC's virtual personal network (sslvpn). It includes news, treaties, opinions, other primary sources, and analysis for IGOs, NGOs, governments, and private organizations on a list of topics too long to reproduce here. It has special sections on hot topics, latest developments, recent topics, countries, world regions, and international organizations. It is updated continually and the *International Environment Daily* has ceased publication. It's an excellent place to look for a topic for a paper or to begin your reading for a paper. It should be used to locate sources, but should only be cited if the original source cannot be located.
